WHY JOB HAZARD ANALYSIS

A JHA is the breaking down of a job into its component steps and then evaluating each step, looking for hazards. Each hazard is then corrected, or a method of worker protection (safe practice or PPE) is identified. Additional requirements for worker training, certification, authorization, etc., may also be identified for the process or job. The final product is a written document... a standard of safe operation for each job. JHA, sometimes referred to as a Job Safety Analysis (JSA), is covered in good detail in the Job Hazard Analysis, OSHA Publication 3071.

BENEFITS OF JSA or JHA

Even simple processes are complex — they are impacted by human behavior, workplace variables, other business and natural forces, raw material variables, normal wear and tear, and more. ACTe2s performs JHAs that break out the steps of a job, evaluate a variety of potential hazards or other related safety requirements, recommend effective controls, and complete a written document that provides a legacy of safe work practices for that job.

- Set performance standards
- Standardize operations based on acceptable safe practices and Personal Protective Equipment (PPE)
- Provides a form of training documentation regarding the employee's knowledge of the job requirements
- Comply with OSHA requirements
- Reduces injuries
- Reduces absenteeism
- Increases productivity
- Increases morale
- Protects employees
- Assists in standard-specific compliance (e.g., personal protective equipment [PPE], Hazard Communication, etc.)

PAST PERFORMANCE
